

Green Procurement Policy

We recognize the preservation of the global environment as a core priority across all our business activities. Guided by our management philosophy of *“Valuing environmental resources and protecting the global environment,”* we are committed to sustainable corporate practices.

In our procurement processes - including raw materials, components, equipment, and services -, we prioritize environmentally friendly options. This includes selecting goods and services that minimize environmental impact and actively avoiding the use of hazardous chemical substances.
Please refer below to Procurement Standard.

Please refer to the Procurement Standard for further details

Procurement Standard

Compliance with RoHS and REACH regulations

In support of the **Circular Economy Action Plan** and the **Chemical Substance Strategy for Sustainability** outlined in the **European Green Deal**, we are committed to continuously reviewing and updating our product environmental technical standards.

As both the **RoHS Directive** and the **REACH Regulation** undergo revisions to align with these sustainability goals, we will revise our standards accordingly. This ensures our products remain compliant and contribute meaningfully to the transition toward a circular economy.
