

Environmental Management System Certification

Environmental Policy

As a responsible manufacturer, Magnescale Co., Ltd. is committed to protecting the global environment. We strive to reduce energy consumption associated with our business activities and prevent pollution through the efficient use of natural resources and energy. Our goal is to develop environmentally friendly products while minimizing our ecological footprint.

We foster environmental awareness among employees and, as a responsible member of society, comply with all relevant environmental laws, regulations, and requirements. We also actively support and align with broader environmental policies and are committed to transparent communication regarding our environmental conservation efforts.

Magnescale's Environmental Initiatives

In pursuit of a sustainable future, Magnescale is dedicated to building a decarbonized and resource-circulating society. Since obtaining ISO 14001 certification in 2010, we have implemented a range of initiatives to reduce CO₂ emissions and environmental impact, including:

- Establishing and maintaining an environmental management system
- Upgrading plant infrastructure with energy-efficient LED lighting and advanced HVAC systems
- Transitioning to CO₂-free electricity at our Isehara Plant, Iga Plant, and Nagoya Sales Office
- Planning the adoption of solar power and CO₂-free electricity at our Tokyo headquarters and the new Nara Plant

ISO 14001 Certification

Magnescale Co., Ltd. obtained ISO 14001 certification in December 1996. We continue operating under the current standard, ISO 14001:2015, which covers our Isehara and Iga manufacturing facilities. This certification reflects our ongoing commitment to environmental management and continuous improvement, supported by active involvement from top management.
