

Information Security

Information Security Initiatives

With the growing risk of cyberattacks, we have designated information security as a critical management priority. To address these challenges, we have established comprehensive information security policies, formed an Information Security Committee, and strengthened our company-wide security management framework.

We actively monitor and respond to emerging threats while sharing security intelligence across the group. Recognizing the importance of safeguarding sensitive customer information, we continuously review and enhance our security practices. In collaboration with trusted partners, we are also reinforcing security measures at offices undergoing digital transformation.

Open and Fair Access to Information

We have implemented a Basic Policy on Personal Information Protection to ensure responsible handling of personal data. When collecting personal information related to precision measuring instruments, we use it strictly within the scope of the stated purpose and maintain appropriate management throughout the retention period.

For details, please refer to Privacy Policy.
