Appendix 2: Adapter connections (scales and gauges)	11 to 12

Preparations before making the initial setting (1/2)

By confirming the conditions of use in advance, the setting operation can be performed easily.
Let's start with the basic settings.

Basic Setting Items

Items	Indication (default)	Description	Setting
Addition display		Selection of addition axis, addition conditions, etc. If you select LATHE (lathe function) in the type selection, this item will appear.	2: No addition, count value of the 2nd axis 3: No addition, count value on the 3rd axis 2 Add 3: Count value of 2nd axis + 3rd axis 2 Add -3: Count value of 2nd axis-3rd axis -2 Add 3: 3rd axis-2nd axis count value -2Add-3: -2nd axis -3rd axis count value
Destination country		Please select the region to be used. (Displayable units)	Std: General Area mm, inch US: U.S.A. mm, inch JPN: Japan mm
Measuring unit resolution		Set the resolution output from the measurement unit to be used for each axis. The resolutions that can be selected are length and angle. Expanded selections increase the number of options.	Length: 0.05 to 100μm *See Tables 1, 2 and 3 or Angle: 1 second to 1 degree *Angular resolution (1sec to 1 degree) when using a rotary scale

Table1: Length scale output resolution

Measuring Unit	Output resolution	connection cable	Adapter *
SR-1711 SR-1711R	0.5μm	HK-**C HK-**CR	SZ05-T01
SR801/ MSS-101 SR801R	0.5μm	HK-1**C HK-2**C	SZ05-T01
SR801/ MSS-101 SR801R	0.5μm	CE07-**C	SZ51-MS01 + SZ70-1
SR10 / SR30 / SR50 SR50-R	0.5μm	HK-4**C HK6-**CR	SZ05-T01
SR118	0.5μm	CE05-**C CH02-**	DZ51 + SZ70-1
SR108 SR107	0.5μm		SZ51-MS01 + SZ70-1
SR128	0.5μm	CH01-**C	SZ70-1
SR128 / SR127	0.5μm	CH01-LW**C	SZ51-MS01 + SZ70-1
SR138R(GB-ER)	0.5μm	CH04-03C	

Table 2: Digiruler output resolution

Measuring Unit	Output resolution	Adapter/ conversion cable	Adapter *
SL110 SL130	10μm	PL20B	SZ70-1
SL110 SL130	10μm	PL20C	
SJ300	1μm	CH33-**CPD/CED	
SJ700	5μm		SZ70-1
SJ700A	5μm		

Table3: Digital gage output resolution

Measuring Unit	Output resolution	Adapter/ conversion cable	Adapter *
DG-B	0.5μm	DZ-51	SZ70-1
DL310B/330B	10μm	DZ-51	SZ70-1
DK series	0.1μm or 0.5μm	CE29-**	

* For adapter information, refer to Appendix 2 Adapter Connection in this Manual

Preparations before making the initial setting (2/2)

Check the usage conditions for Detailed Settings.
(Since the setting conditions can be changed later, use the default values to skip items for which the conditions have not been confirmed)

Detailed Setting Items

Items	Indication (default)	Description	Setting
Display resolution and polarity 		Sets the resolution to be displayed for each axis. A value lower than the input resolution cannot be set. Selects the value for each axis, including the polarity (+/-). The default value is set by the basic setting.	Length: 0.05 to 100μm or Angle: 1 second to 1 degree
Scaling 		Displayed by multiplying the measured value by the magnification	0.1 times to about 10 times
Error compensation 		Setting of linear compensation and segmented error compensation	Err OFF：off Lin Err：linear compensation ±600μm/m *Expanded selections ±1000μm/m SEG Err：segmented error compensation
Flicker control 		Flicker prevention function for the smallest display digit	OFF: Function stop 1: Weak 2: Strong
Sleep 		The display turns off when there is no movement of the length measurement unit or key operation for a certain period of time while the power is on. It will return when the length measurement unit is moved or the Key operation is performed again.	OFF: Do not put to sleep 1: 1 minute later 5: 5 minutes later 10:10 minutes later 30:30 minutes later 60: 60 minutes later

How to set up Basic Settings (1/3)

Step 1 Configure the basic settings.
Choose one of the following methods of operation.

Note:
If you change the basic settings,
Detailed Settings will be reset to the factory defaults.

When the power is turned on for the first time after shipment from the factory

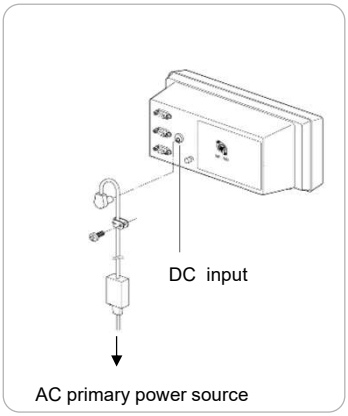
Connect the AC adapter and turn the primary power "on".

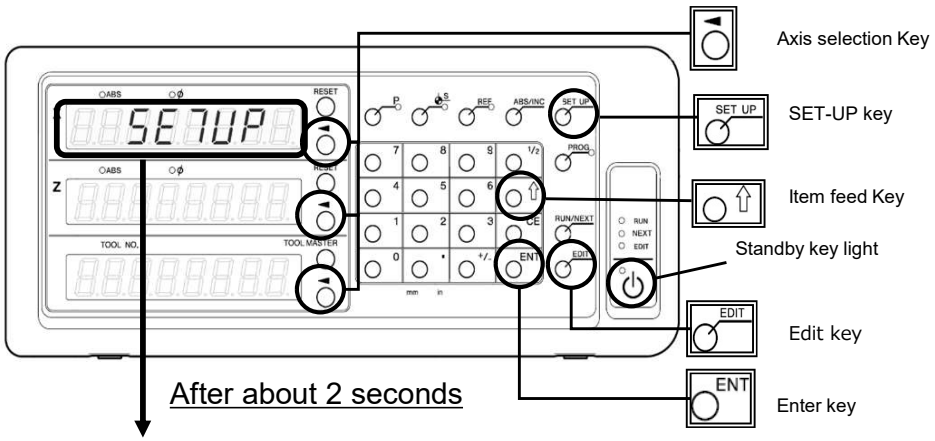
When you want to change the basic settings

AC adapter is energized.
Turn on key, the LED light changes from "blinking" to "off" and then press and hold key for 3 seconds.

The following display appears

Connecting the AC Adapter

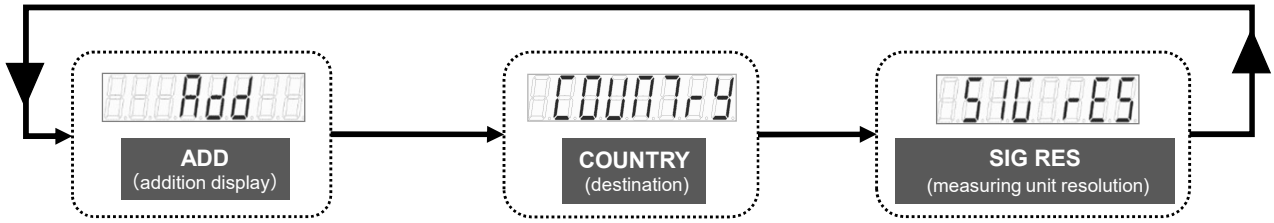




LH72 (3 axes input)

Continued on next page

Pressing key changes the basic setting mode in the order in which it is set.



ADD(Z-axis addition axis setting):
Selection of length measurement unit input for input 2nd axis and input 3rd axis, and setting of addition display **(Note)**

Note: When displaying the Z axis in addition, be sure to connect a scale with high resolution to input 2 of the display unit.

COUNTRY (destination country):
Please select your region

Signal resolution (Measuring unit resolution):
Sets the output resolution of the scale to be connected. Supports the input of length and angle display units.

COUNTRY (Destination)

Symbol		Destination	Unit
STD	Std	General area	mm, inch
US	US	U.S.A.	mm, inch
JPN	JPN	Japan	mm

How to set up Basic Settings (2/3)

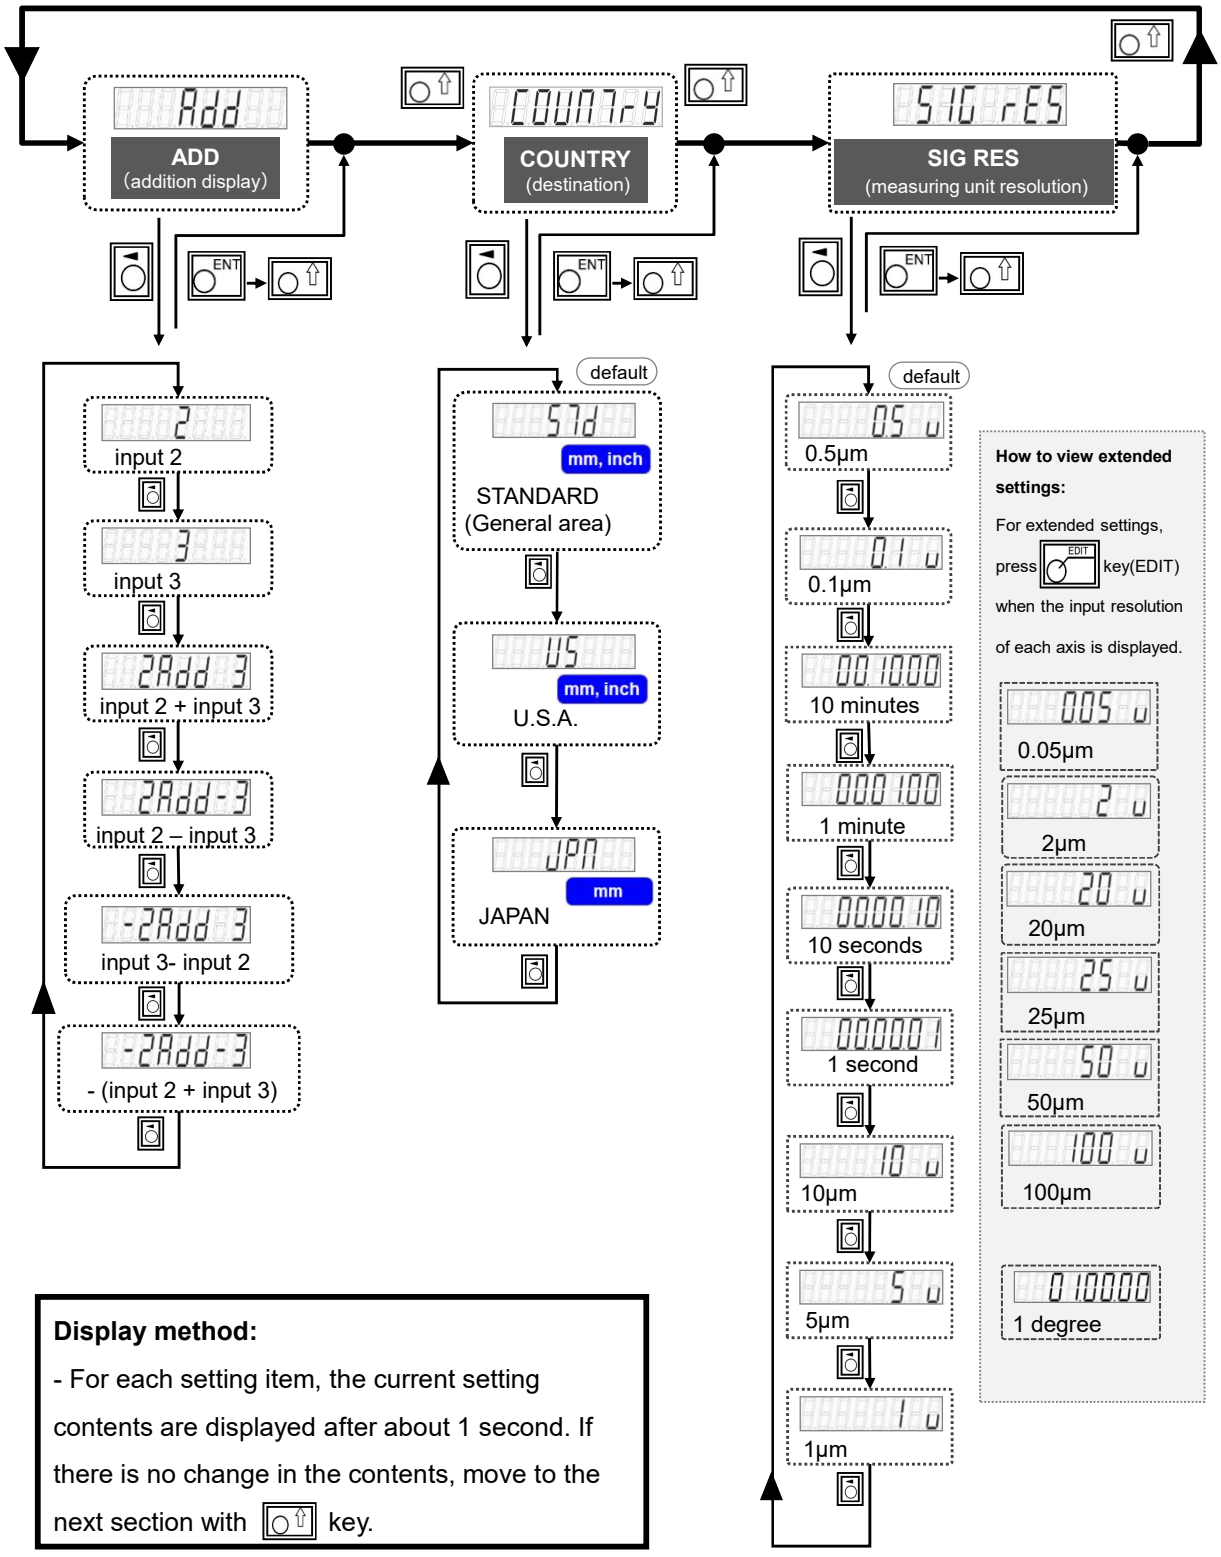
Step 2 Enter the settings confirmed in "Preparations before making initial settings (1/2)". Repeat steps (1), (2), and (3) to make the basic settings.

(1) Use key to change the basic setting item.

(2) The setting selection can be switched with key on the right side of the counter display.

(3) To define the new value, press ENT key.

Basic Settings



Display method:

- For each setting item, the current setting contents are displayed after about 1 second. If there is no change in the contents, move to the next section with key.

How to set up Basic Settings (3/3)

Step 3 Once you have completed the basic settings, exit this mode and move to Detailed Setting mode.

How to Exit Basic Setting Mode

① Press RESET key or SET UP key.

② The display changes to CANCEL .

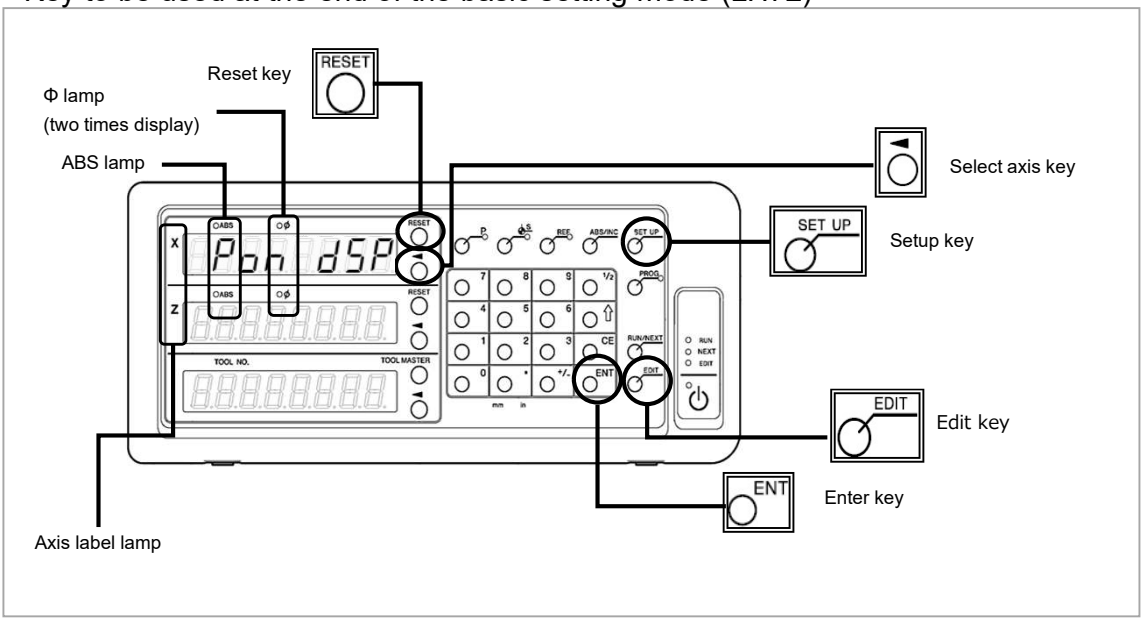
③ Pressing ◄ key displays FINISH .

④ Press ENT key.

⑤ Press RESET key. The display returns to normal.

This completes the basic settings.

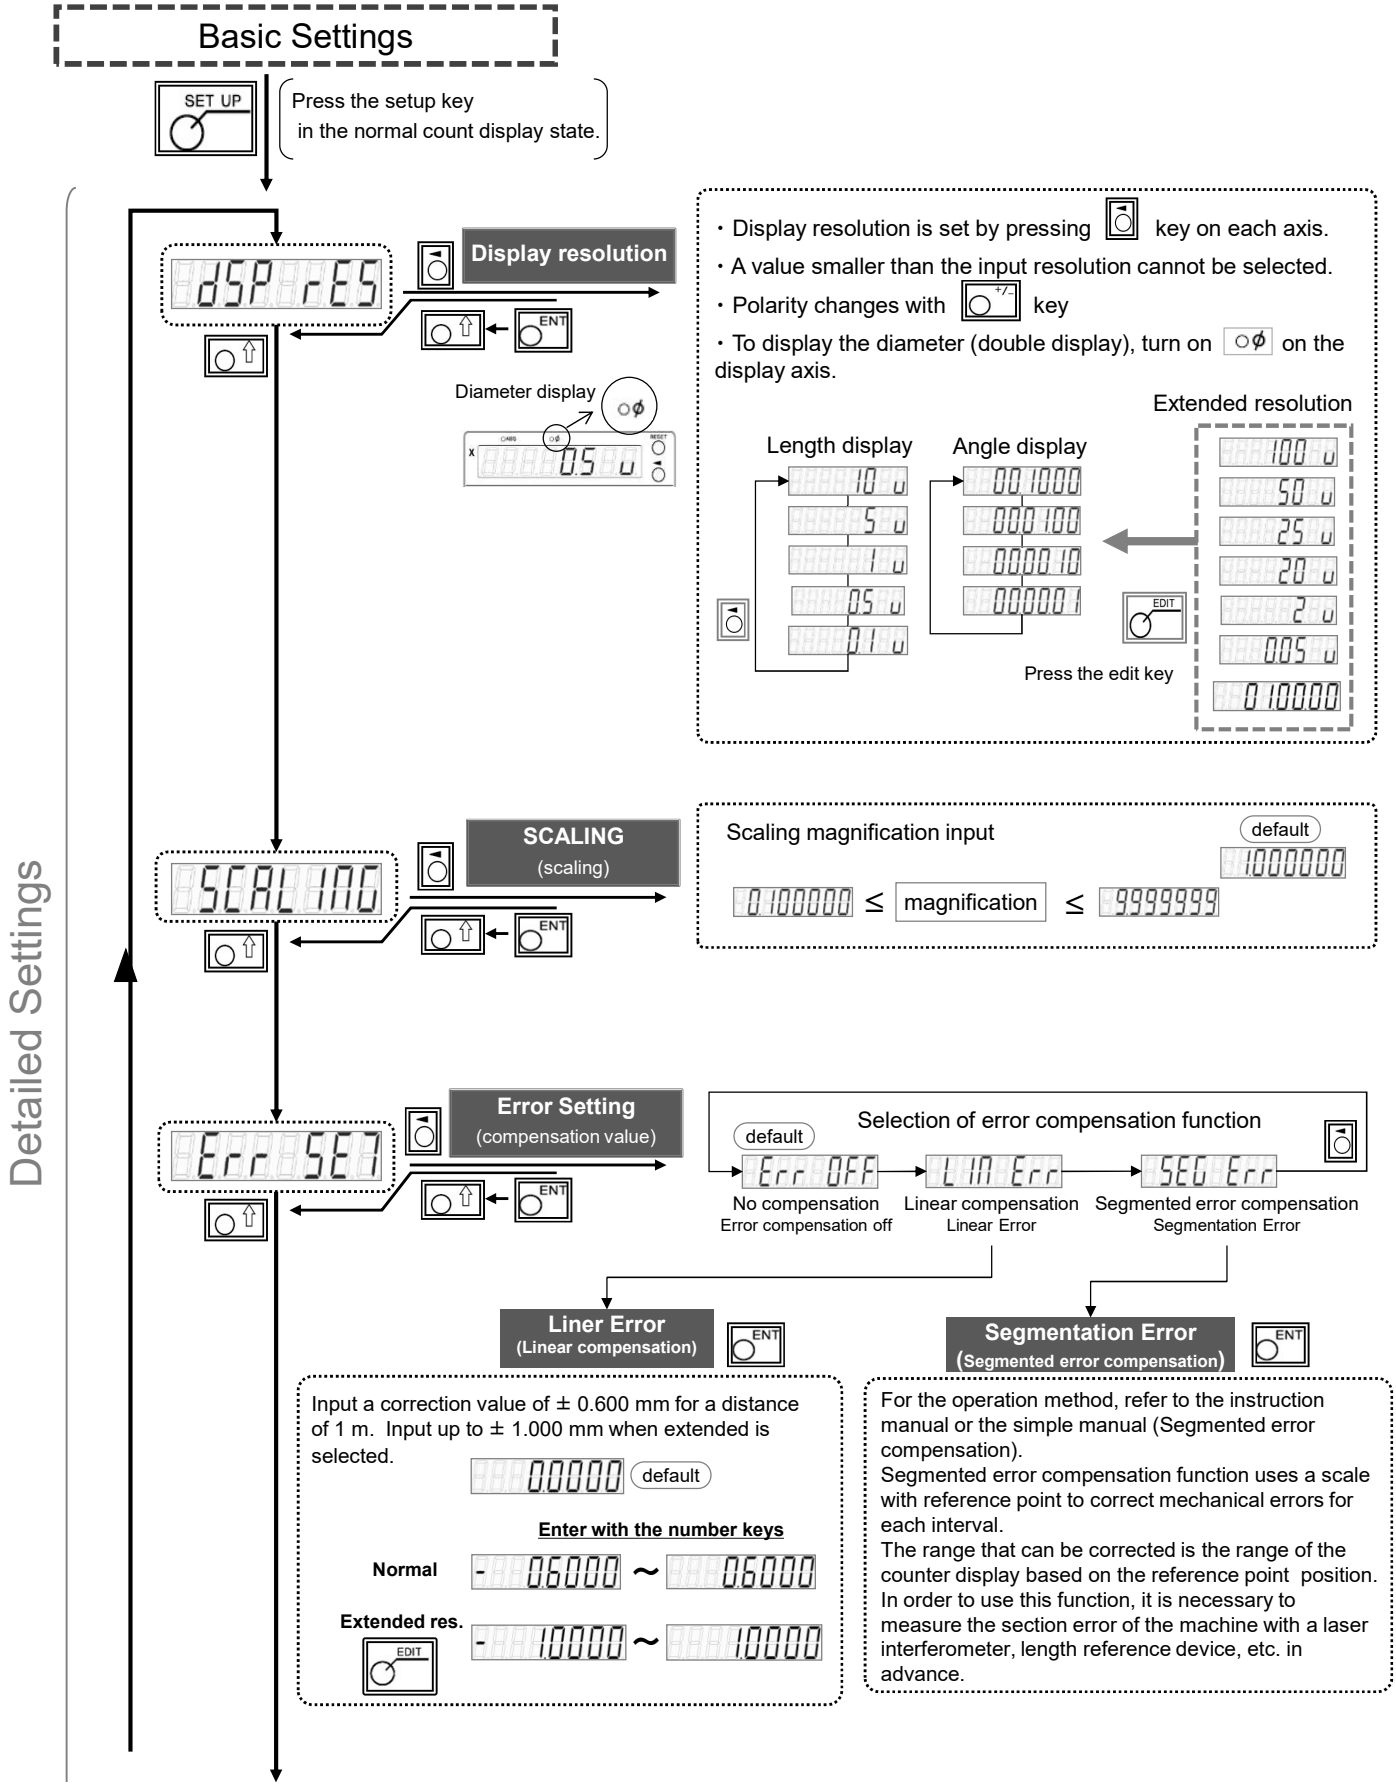
Key to be used at the end of the basic setting mode (LH72)



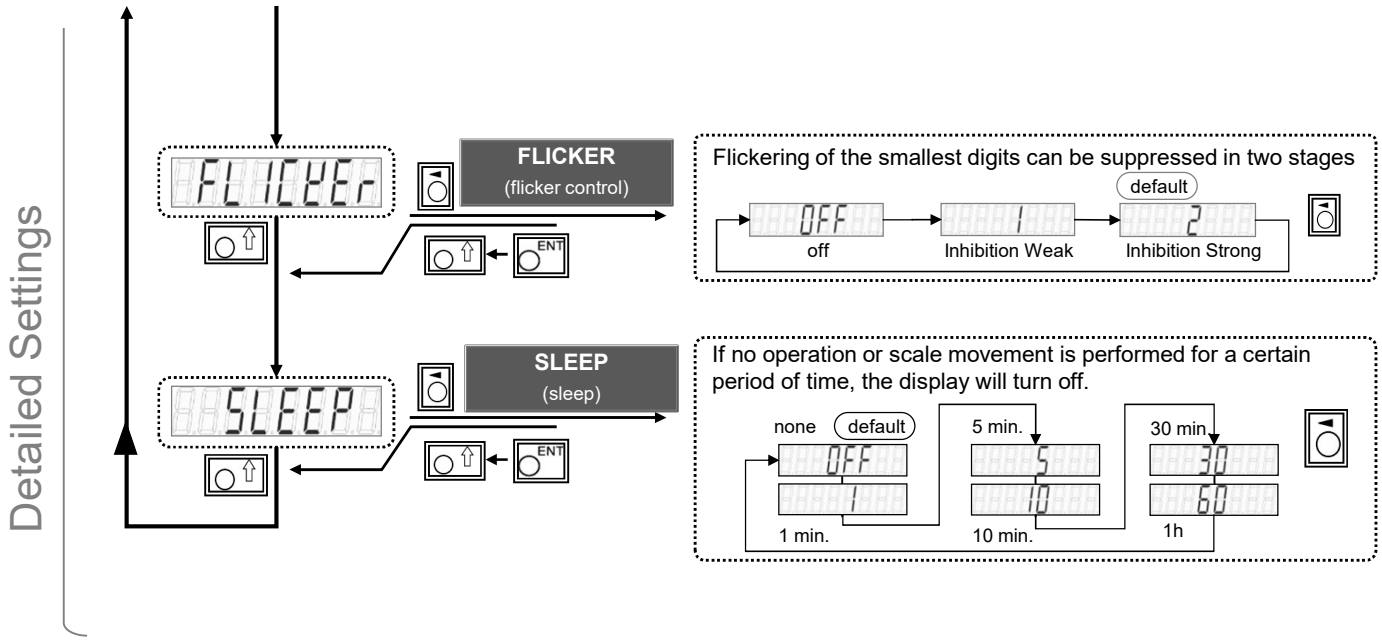
How to set up Detailed Settings (1/1) (continued from Basic Settings)

Step 4 Make the detailed settings.

*If you have already completed the basic settings and want to reconfigure only the advanced settings, you can do the same.



Detailed Settings



Step 5

When the Detailed Settings are complete, switch to the normal display.

Press RESET key.

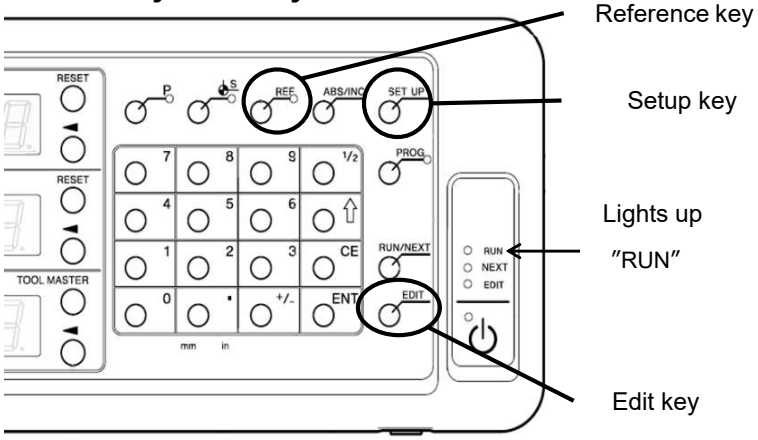
This completes the initial settings..

Factory Default (All Clear)

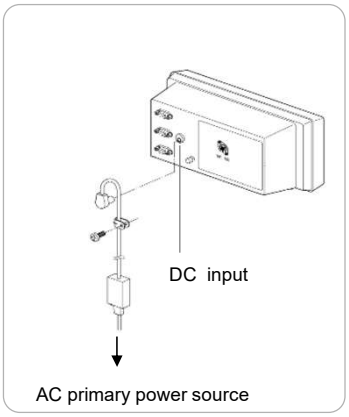
To set the factory settings (all clear), perform the following operations.
Make preparation such as taking notes in advance for necessary items.
Also, do not perform any operation other than the explanation.

Caution: If you do this, all settings will be the factory default settings.

Mainly used keys



Connecting the AC Adapter



1. Hold down [REF] key and [SET UP] key at the same time to start the power supply.

   Connect the AC adapter to the DC-IN input on the back of the counter and turn on the primary power supply.

⇒ The model name of the counter is displayed

2. When you press [REF] key, is displayed, followed by .

3. Pressing [REF] key changes the display as shown below.

START → → → →

→ → → completion

4. "RUN" LEDs will be lit.

5. Press [EDIT] key to confirm the number of input axis.

   In case of LH72-3 is displayed.

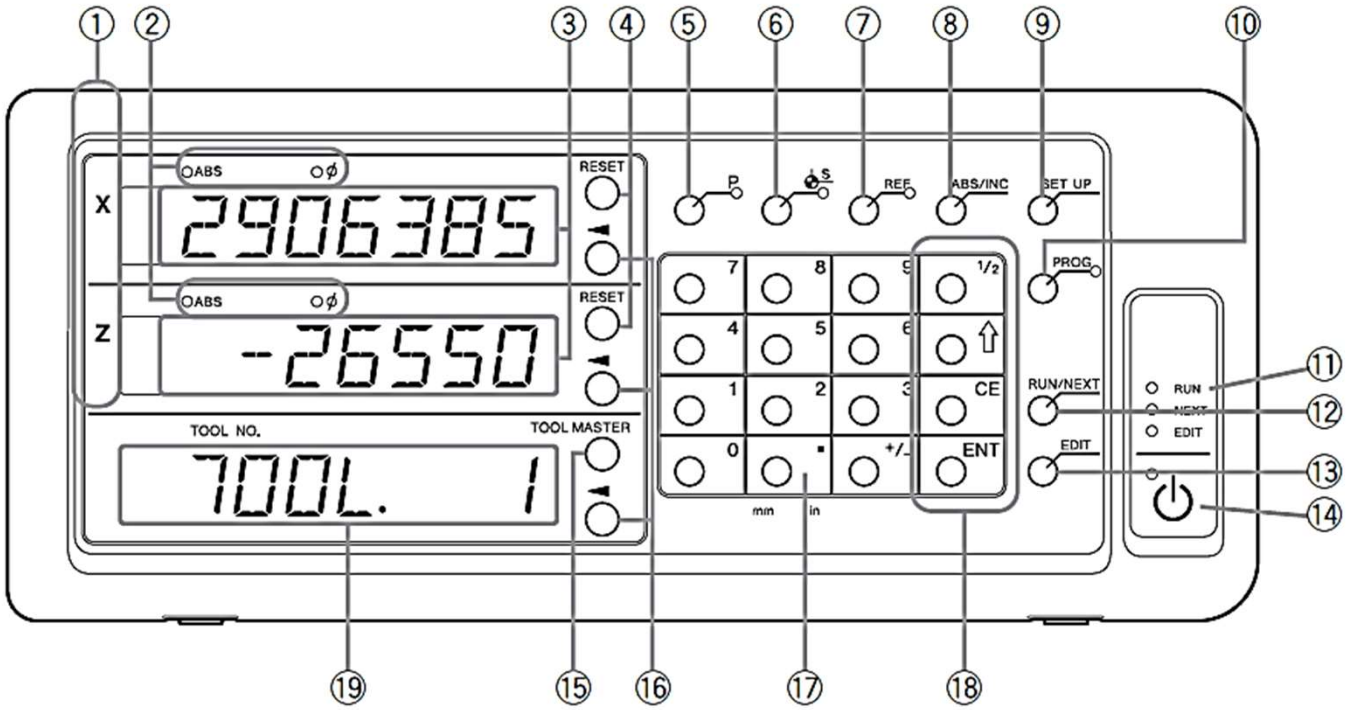
6. Turn off the primary power supply of the AC adapter.

How to check the software version:

Power ON → Display LH → [Mset] Key → Version
Press any key to return to the LH display.

Appendix 1

Front panel



No.	Name	No.	Name	No.	Name
①	Axis label	⑧	ABS/INC key	⑮	TOOL MASTER key
②	ABS lamp, Φ lamp	⑨	SETUP key	⑯	Axis select key
③	Counter display	⑩	PROG key	⑰	Numeric key
④	RESET key	⑪	Status lamp	⑱	Function key
⑤	P key	⑫	RUN/NEXT key	⑲	Tool coordinates (Tool number)
⑥	Datum point value setting key	⑬	EDIT key		
⑦	REF key	⑭	Standby key		

Alarm indication

Display	Status	Display	Status
Error	Measurement unit not connected	LH (Blinking)	Storage data error
SPd Err	Speed over (Note)	rError	Error in reference point detection
F000000	Overflow	PrG Err	Program error
LH	Power failure	NO7 rUN	Program error

Note: When using an adapter connection (SZ**), no speed override indication is shown, but rather an error message.

Appendix 2-1 Adapter connection (Length scale)

Scale/ Head	Resolution	Adapter	Counter
SR128(GB-A)	0.5μm	SZ70-1	LG20 LH70/71/71A/72 LY71/72
